

New Guidelines in Pediatric Trauma

Presented by:

Dr. James Holmes, Professor and Vice Chair for Research, UC Davis School of Medicine

Dr. Nate Kuppermann, Professor and Bo Tomas Brofeldt Endowed Chair, UC Davis School of Medicine

Dr. Julie Leonard, Associated Professor of Pediatrics, Pediatric Emergency Physician at Nationwide Children's Hospital

Objectives: As a result of having participated in this webinar, attendees will be able to:

- Describe the derivation of the PECARN abdominal injury rules
- Identify the appropriate use of the PECARN abdominal injury rules in injured children
- Assess the potential adverse effects of using a rigid long board and cervical collar for trauma transport
- Define factors that can aid identification of children at risk for cervical spine injury whom may benefit from spinal motion restriction during trauma transport
- Define best imaging practices for evaluating children for cervical spine injury
- Discuss the epidemiology of head trauma in children
- Understand prediction rules for which children with head trauma need CT scans
- Discuss how one implements prediction rules to change physician practice
